

Free fonts Pack

Foto123 Fonts Pack

About the pack

The sample fonts pack is a selection of fonts curated by the launch pack designers at Taopix. This pack includes a selection of fonts which are used in Taopix launch pack products. The pack includes a range of different style fonts and also a selection of unicode fonts.

Font Licensing

Before choosing any fonts, it is important to have an understanding of font licensing and how that applies to the needs of your business. Before using any font, you should always double-check and read the individual font license to ensure the font is right for your project. The following font licenses allow you to use fonts for both print and digital, and also for commercial use. You are unable to sell the fonts on their own.

SIL Open Fonts License version 1.1 (Open Source License)

Most fonts within this pack will be available under the Open Source Fonts License. This is one of the major open font licenses which allows you to embed fonts and bundle the font in commercially sold products.

Apache License version 2.0

Another font license you will come across is the Apache License version 2.0. This license allows you to embed fonts and bundle the font in commercially sold products.

Disclaimer

Before using any of these fonts, please check that the licenses are suitable for your business. Whilst we have made every effort to ensure the fonts in this pack are available to use for free, it is the Taopix Licensees responsibility to ensure you are using the correct license for use on your Taopix system.

Taopix have tested these fonts work on the Taopix system, however we recommend that you carry out your own tests of the fonts especially in regards to printing.

Taopix Ltd cannot be held liable or responsible for any fonts you use on your Taopix system, please refer to the individual font licensing agreements and where appropriate or required take legal advice.
